What are One-Off Projects?

Order Types · https://thankster.com/docs/what-are-one-off-projects/

These are projects that are sent one time, either immediately after completion or scheduled for a later date. They consist of a design (which can be saved as a template) and recipients, whom you can import or add one at a time. While you can copy them for later use, it's important to note that they are not automatically recurring like campaign orders or API orders.

See pricing for one-off projects.
